Education

The University of Texas at Dallas | Richardson, TX Dec 2023 - May 2025
Master of Science in Computer Science **GPA 3.7/4.0**

The University of Texas at Dallas | Richardson, TX Aug 2020 - Dec 2023
Bachelor of Science in Computer Science **GPA 3.8/4.0**

Relevant Courses: Machine Learning, Artificial Intelligence, Natural Language Processing, Advanced Algorithm Analysis, Data Structures, Big Data Management, Quantum Computing, C/C++ Programming in Unix, Computer Architecture

Programming Languages and Technologies

Languages: Python, Java, Go, C++, C, SQL, JavaScript, TypeScript, HTML, CSS, Swift, MIPS Assembly

Frameworks and Tools: Git, AWS, Firebase, PostgreSQL, NewRelic, Node.js, React.js, TailwindCSS, Express.js, Linux, Jenkins, UNIX, Bash, Arduino, Jira, Databricks, Snowflake, Open Telemetry

Experience

Capital One Technology Internship | Software Engineer | Chicago, IL June 2024 - August 2024

- Enabled Open-Telemetry and NewRelic to monitor the secured card returns process, providing actionable metrics on internal systems and enhancing the reliability of system performance
- Developed a dashboard using Go and React, providing real-time analytics and insights on the returns process
- Collaborated with teams to integrate various monitoring tools for seamless data flow and system optimization

Capital One Technology Internship | Software Engineer | New York, NY June 2023 - August 2023

- Developed a machine learning model to deliver shopping offers to over 150k daily users accurately
- Implemented a targeted offer system that personalized promotions based on user purchases, resulting in a 64% increase in average revenue per user and a 66% improvement in purchase prediction accuracy
- Utilized various cloud computing tools to train and update models in real-time to maximize model accuracy

Capital One Early Technology Internship | Software Engineer | McLean, VA June 2022 - August 2022

- Collaborated with a team of 5 to implement NewRelic Distributed Tracing in various Capital One services
- Orchestrated seamless communication channels across cross-functional teams, facilitating peer learning and growth, resulting in decreased rework and increased knowledge sharing
- Attended a 5-week boot camp aimed toward the training and teaching of essential software engineering tools

Projects

HackPortal | TypeScript, Next.js, Firebase, React, TailwindCSS May 2022 - May 2025

- Developed an open-source platform to streamline hackathon management with tools for registration and check-in
- Enabled organizers to tailor HackPortal with custom features and integrations to enhance hackathon experience

EnvSetup | Bash, Powershell, Markdown July 2023

- Constructed an interactive terminal-based installer for programmers to help set up new devices for programming
- Implemented automatic architecture and operating system verification to ensure proper installation of software

Recipe Browser | JavaScript, Go, Python, React, TailwindCSS July 2022

- Created a full-stack application that employed complex components to offer users a quick recipe look-up
- Embedded a machine learning aspect that utilized natural language processing and cosine similarity to return users with accurate recipes based on ingredients

BET (Budget and Expense Tracker) | JavaScript, React, AWS, Arduino, TailwindCSS January 2022

- Integrated AWS Amplify to allow for secure handling of account information and user data from databases
- Developed application that connected React app to Arduino hardware to display expenses via pie-chart data
- Assembled program to fully incorporate software to hardware communication with a team of 6

Activities

HackUTD Co-Director | Richardson, TX May 2022 - Dec 2024

- Spearheaded the organization of HackUTD, the largest 24-hour hackathon in North America, attracting 1100+ participants from diverse backgrounds
- Led a team of 33 organizers in managing logistics, sponsorships, marketing, and participant experience, ensuring a smooth and successful event
